

AccessibleAI SIMPLE Prompt Best Practice Methodology

S

Specificity

Direct prompts that reduce ambiguity

"Summarize the current trends for two-bedroom condos in downtown Miami, including average price, market demand."

I

Iteration

Adjust, refine prompts based on received responses

If "what's the history of jazz music" lacks depth, try "Detail the evolution of jazz from 1920-1960."

M

Multi-Question

Have ChatGPT prompt the user for additional depth

"Write the marketing plan with the data provided and prompt me with any other questions required to complete."

P

Personalization

Establish a persona to guide output

"Take on the persona of a successful real estate blogger and suggest 5 blog topics relevant to the Miami, FL market."

L

Logical Inquiry

Create prompts that lead to refinement

"Summarize the current project challenges then I'll ask more to pinpoint specific areas of focus."

E

Expansion

Promote additional/alternative ideas

"I'm opening a yoga studio/bookstore. List 10 potential domain names for my new business in Greenville, SC."
